- Treats up to 1,000 NTU & 150 gpm
- Can be run in series or parallel
- One man operation
- Minimal supervision required
- 'Plug & Play' & Easy to use
- Rechargeable
- **SIMPLE**

MEETS ALL REGULATORY REQUIREMENTS

Designed and developed by [Clearflow Group Inc](#), with support from the National Research Council of Canada and research conducted at the University of Alberta, to help protect Canada's environment.

At under 8 feet long, the Bazooka is capable of operating at 150 gallons per minute in a variety of environments. Custom sizing is available for rent or purchase. To begin the process all we need is a sample of the influent chemistry to develop the specific water treatment for you. Turn your run-off water into "Clearflow" in seconds not days!
