

SNOW REMOVAL TARPS

Remove freshly fallen snow from your worksite quickly and efficiently with Snow Removal Tarps. Simply lay the tarps out in a grid the day or evening before the forecasted snow arrives. Once the snow subsides, lift the tarps and the snow with a crane and get on with your work. Snow Removal Tarps allow contractors to clear job sites quicker, allowing production to move forward.

Put your shovels away and save hundreds of man-hours with a Layfield Snow Removal Tarp. Please be aware that these tarps are only to be used with freshly fallen snow.

SNOW REMOVAL TARP HANDLING INSTRUCTION

This tarp is intended for snow removal only.

1. Lay the tarp flat on the ground with the webbing touching the ground. It is quite crucial that the webbing is on the bottom before lifting.
2. The tarp should be inspected regularly while keeping an eye out for tears and/or rips.
3. The four lifting loops should be inspected regularly for cuts or abrasion.
4. If the lifting loop has been damaged in any way, then it should be put aside for non-use.
5. After the season is over, the tarp should be cleaned and inspected for rips or tears, and then put away dry in a covered area.
6. If there is ever a concern about what is a safety issue or not, then the tarp should be shipped to Layfield for inspection.
