

# ENVIRO LINER<sup>®</sup> 6000 GEOMEMBRANES

## SPECIALTY GEOMEMBRANE FOR THE TOUGHEST LONG-TERM CONTAINMENT PROJECTS

Layfield's Enviro Liner<sup>®</sup> 6000 is the "OG" of high-performance geomembranes, built for exceptional durability in demanding applications. This flagship geomembrane combines the benefits of blended LLDPE and HDPE resins with an advanced stabilization package, delivering superior long-term performance.

Founded on decades of proven performance, Enviro Liner<sup>®</sup> 6000 incorporates the latest ultraviolet/anti-oxidant (UV/AO) stabilization technology. Specifically designed for long-term exposed applications, it offers an outstanding balance of UV stability, chemical resistance, flexibility and mechanical strength, making it one of the most robust polyethylene geomembranes available.

### LONG-TERM EXPOSED APPLICATIONS

Advanced UV/AO stabilization technology provides exceptional protection and durability to prevent cracking, brittleness, and fading.

### POTABLE WATER COMPLIANT

NSF/ANSI 61 certified geomembrane is safe for potable water applications and direct contact with drinking water.

### EXCELLENT CHEMICAL RESISTANCE

Built to resist a wide range of chemicals, ensuring durable containment in most challenging chemical environments.
